

### **Product introduction**

Micronized Polyamide Wax

### **Chemical composition**

Polyamide

### **Features and advantages**

1. Excellent anti-sag performance;
2. Excellent anti-precipitation performance;
3. Lighter color.

### **Recommended use**

1. Applicable to various solvent-based systems such as anti-corrosion coatings;
2. Applicable to various non-aqueous systems such as solvent-free.

### **Recommended dosage**

0.2-2.0% of total formula

### **Technical data**

Melting point (°C):	140
Average particle size (D50):	3-5
Exterior:	Light white to light yellow powder

### **Processing guidance**

1. The product can be added at all stages;
2. Avoid high temperature during the production process;
3. Activate before use.

### **Storage and transportation**

1. Cool, dry and ventilated, below 60°C, and not close to fire;
2. Shelf life in airtight containers is two years.

### **Package**

20kg paper bag.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
