

Product introduction

Modified wax powder

Chemical composition

PTFE modified wax powder

Features and advantages

1. There is no water spot for coil coating;
2. Good surface smoothness;
3. Excellent scratch resistance and abrasion resistance, not scratch resistance.

Recommended use

This product is suitable for a variety of coating systems, including:

- | | |
|-------------------------|-------------------------|
| 1. Coil coating; | 2. UV coating; |
| 3. Metal foil coatings; | 4. Industrial coatings. |

This product is suitable for various water-based and oil-based resin systems.

Recommended dosage

0.1-2% of total paint.

Technical data

Partial melting point (°C):	315-325
Average particle size (D50):	4-5
Average particle size (D90):	7-8
Exterior:	Fine white powder

Processing guidance

1. The front and back sections can be added;
2. It is easy to disperse, and can be dispersed through medium to high speed stirring;
3. You can add front-end grinding.

Storage and transportation

1. Cool, dry and ventilated, below 60°C, and not close to fire;
2. Shelf life in sealed package is one year.

Package

Packed in 25kg paper drum.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
