

### **Product introduction**

Modified wax

### **Chemical composition**

High molecular polymer modified wax powder

### **Features and advantages**

1. Excellent transparency;
2. High hardness;
3. Excellent chemical properties;
4. Extremely excellent wear resistance.

### **Recommended use**

This product is suitable for a variety of coating systems, including:

1. Coil coating;
2. UV coating;
3. Metal foil coating;
4. Industrial coatings.

This product is suitable for various water-based and oil-based resin systems.

### **Recommended dosage**

0.5-5% of total paint.

### **Technical data**

Partial melting point (°C):	180
Average particle size (D50):	5
Average specific surface area (m <sup>2</sup> /g):	9
Exterior:	Fine white powder

### **Processing guidance**

1. Generally added in the post-production stage;
2. It is easy to disperse, and can be dispersed by stirring at medium to high speeds.

### **Storage and transportation**

1. Cool, dry and ventilated, below 60°C, and not close to fire;
2. Shelf life in sealed package is one year.

### **Package**

20kg package.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
