

Product introduction

Micronized mixed polypropylene wax which can produce special textured effect

Chemical composition

Polypropylene wax

Feature advantages

1. Help the paint to form a special mesh effect;
2. Solvent type, powder coatings are common;
3. The net pattern is even and the effect is stable.

Recommended use

1. Home appliance topcoat;
2. Coil coating;
3. General industrial paint.

Recommended dosage

0.1-2% of the total coating amount.

Technical data

Melting point (°C):	161
Average particle size (D50):	10 ± 2
Average particle size (D90):	15 ± 3
Proportion:	0.89
Exterior:	Fine white powder

Processing guide

1. Join in the latter part of production;
2. Mix and disperse at medium to high speed.

Storage and transportation

1. Cool and dry and ventilated, below 50 °C, not close to fire;
2. The shelf life of the sealed container is two years.

Package

20 kg packaging.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
