

### **Product introduction**

Micronized mixed polypropylene wax which can produce special textured effect

### **Chemical composition**

Polypropylene wax

### **Feature advantages**

1. Help the paint to form a special mesh effect;
2. Solvent type, powder coatings are common;
3. The net pattern is even and the effect is stable.

### **Recommended use**

1. Home appliance topcoat;
2. Coil coating;
3. General industrial paint.

### **Recommended dosage**

0.1-2% of the total coating amount.

### **Technical data**

Melting point (°C):	161
Average particle size (D50):	50±3
Average particle size (D90):	75±5
Proportion:	0.89
Exterior:	Fine white powder

### **Processing guide**

1. Join in the latter part of production;
2. Mix and disperse at medium to high speed.

### **Storage and transportation**

1. Cool and dry and ventilated, below 50 °C, not close to fire;
2. The shelf life of the sealed container is two years.

### **Package**

20 kg packaging.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
