

Product introduction

1. Patented products;
2. Spherical polyethylene ultrafine wax powder.

Chemical composition

Polyethylene

Features and advantages

1. Better transparency;
2. More excellent surface feel;
3. Lower friction coefficient and smoothness;
4. More excellent lubrication;
5. More excellent scratch resistance and abrasion resistance.

Recommended use

This product is suitable for various plastics, coatings, inks and cosmetic systems.

Recommended dosage

1-5% of total resin solids.

Technical data

Melting point (°C):	115
Average particle size (D50):	5-7
Average particle size (D90):	10-13
Proportion:	0.96
Exterior:	Fine white powder

Processing guidance

1. Join in the post-production stage;
2. Stir and disperse at medium and high speed;
3. Grinding should be avoided due to its low melting point.

Storage and transportation

1. Cool, dry and ventilated, below 60°C, and not close to fire;
2. Shelf life in airtight containers is two years.

Package

20 kg packaging.

We provide these data and technical advice with our existing knowledge. However, because of the different application environment, please users according to the test application, we can not guarantee all the circumstances.
